ALFIDO TECH | TASK 3

Website Traffic Analysis – Executive Summary

Dataset period: 19–25 August 2021 | 226,278 event records | 3,839 link IDs

Key event metrics

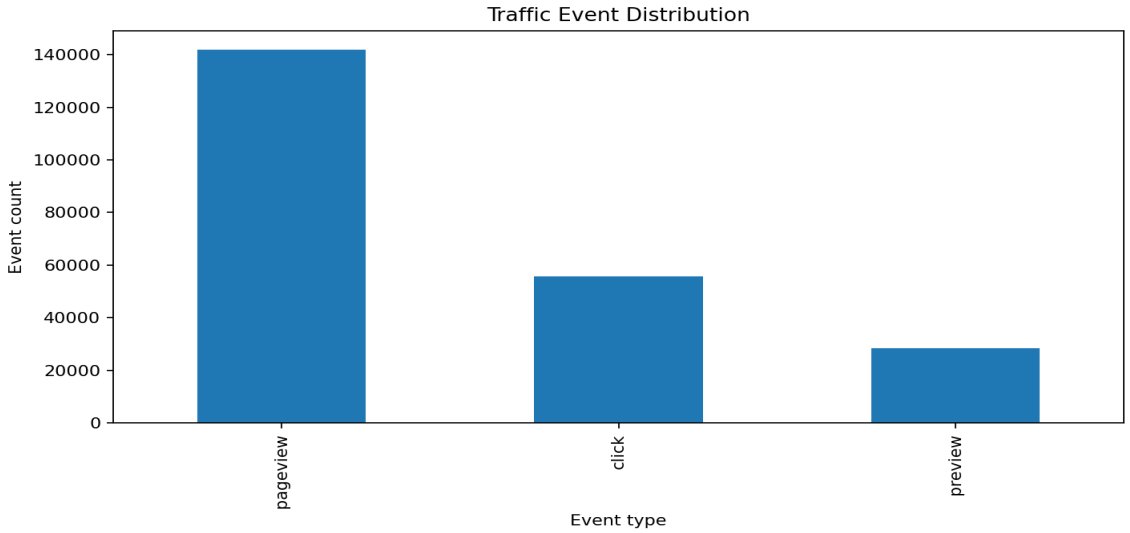
Pageviews	Clicks	Previews	Click/pageview ratio
142,015	55,732	28,531	39.24%

Key findings

• Top click markets: India (11,609), United States (9,533), Saudi Arabia (9,495).
• Most-clicked artist: Tesher (9,692).
• Most-clicked track: Jalebi Baby (9,692).

Five recommended actions

1. Add user IDs, session IDs and event timestamps.
2. Capture page URLs and referral/UTM source data.
3. Test calls to action and page layouts using event-level diagnostics.
4. Localize campaigns for the leading click markets.
5. Track downstream outcomes beyond clicks.

Data caveat


The source lacks user/session IDs, page URLs, referrers and duration. Sessions, unique users, bounce rate, average session duration, user journeys, landing/exit pages and referral sources cannot be measured. The click/pageview ratio is not a conversion rate.
